

The Perfect Travel Bag!

This is the perfect bag! We were sent this bag for a review and gave it to our photographers to try out. They both gave it a ten. "Hands down the best bag I have ever used. I will never use any other bag to transport my gear." - Joey Costa

Since 2004, ZÜCA has been developing super-durable, absurdly versatile travel carry-alls for the fast-paced world of today's consumer. The sleek, agile bags are now a global sensation for everything from school roller bags to pet carrier to the "it" carry-all for professional make-up artists, sports enthusiasts and business travelers looking for lasting quality. With hundreds of style and color combinations, the ever popular ZÜCA carry-all bags can be purchased at mainstream and specialty shops in over 25 countries around the world, and online at zuca.com.

ZÜCA products have a look that is exclusively their own. While traditional luggage has the frame on the inside, the ZÜCA Artist Case's anodized aluminum alloy frame is on the outside (a patented exoskeleton design). From a design perspective, this accomplishes several things. First, it provides users with more interior packing space. Second, it protects the soft insert bags and all of the personal valuables inside. Third, the soft insert bag can be removed, so it can be cleaned or replaced. Finally, and most novel, users can sit on their ZÜCA carry-all, because it has a comfortable and convenient built-in seat at the top of each bag that can hold up to 300 pounds.

From the rugged and durable Outdoor Collection to awe-inspiring graphics that push the envelope for what's possible on a bag, we're always looking for ways to pack your ZÜCA experience full of function and personality. See our latest innovations here.

Keep calm and carry on with the sleekest, neatest and handiest rolling luggage on the road. Travel bags feature built-in seats and stacking pouches. Make-up bags are beautifully organized. Travel backpacks come—and go along—in coordinating designs.

It rolls silently.

- It can open from multiple sides so you can access your stuff no matter where you put the bag.
- The frame is also a seat (holds up to 300 lbs.) so you never have to worry about finding a chair when you are outside or in a crowded location.
- The bags can be personalized with your name.
- You can mix and match the frame and bag for hundreds of color and design combinations.
- It is TSA-compliant, if you are a frequent traveler.
- The bag is washable.
- Many inserts are available to customize the interior of the bag, including inserts to carry food and inserts that are waterproof. zuca.com

Once you try this bag no other will do!

The ZÜCA Skipper Artist offers sophisticated styling with smart details: a laptop and tablet pockets, numerous interior and exterior pockets for the tools of your trade and other accessories. Key features include:
